

## **The Effect of In-Medium Nucleon-Nucleon Cross Section on the Elastic Scattering of Heavy-Ion Reaction**

A.Sh.Ghazal

(Physics department , Faculty of Science ,Cairo University ;Giza ,Egypt)

Elastic scattering cross section of heavy-ion reactions at low and intermediate energy is calculated . The calculations have been done using Coulomb modified Glauber model . The effect of the in-medium nucleon-nucleon (NN) cross section on the elastic scattering calculations is studied. The obtained results are compared with the experimental data.
