

C.R. FROM SNR, II: ANISOTROPIES

A.D.Erlykin (1) and A.W.Wolfendale (2)

(1) Lebedev Institute, Moscow, (2) University of Durham, UK

The Monte Carlo analysis of CR from SNR has been used to predict the anisotropy of arrival directions of CR over a wide energy range. The measured dependence of anisotropy amplitude and phase are best fitted if there has been a recent, local SN.
