

## Search for magnetic monopoles at Chacaltaya

**S. Cecchini, for the SLIM Collaboration**

Istituto TeSRE/CNR, v. P. Gobetti 101, 40129 Bologna, Italy

**Abstract.** The new large area ( $400 \text{ m}^2$ ) experiment - SLIM - to search for Magnetic Monopoles and other exotic massive particles is presented. It uses Nuclear Track Detectors and is installed at the Chacaltaya Cosmic Ray laboratory. The detection capability of the experiment are discussed.
